

Scope of Knowledge for Master of Radiology MedEx.

The entrance examination consists of multiple choice questions (MCQ).

1. This paper has 50 questions of True-False format.
2. Each question consists of an initial statement followed by 5 possible completions (stems). Each stem can be True or False.
3. The candidate is required to shade the appropriate answer in the appropriate circle marked 'True' or 'False'.
4. Candidates have the option of not answering the stem by not shading the circle.
5. The maximum mark for each question is 5 and the minimum mark for each question is 0.
 - a. Each correct answer (a true statement indicated as true, or false statement indicated as false) will be awarded with one mark (+1).
 - b. Each wrong answer will not be given any marks (0 mark)
 - c. Statement with no answer will automatically be given zero mark (0).
6. The duration of the examination is 2 hours.
7. The examination will cover the following
 - i. Radiological Anatomy
 - ii. Techniques and Procedures in Radiology
 - iii. Clinical Radiology
